The legislation compare tool enables you to compare two versions of a legislative provision - marking up the differences. The option appears at the top of the Arrangement of the Act/SI so that you can select and compare multiple provisions.

If you are viewing an individual provision then you can choose specific versions from a list.

If you have selected multiple provisions then you can specify a date, choose law in force, future versions or draft versions:

- **Total differences** – use the arrows to go through each change
- **Delivery options**
- **Remove highlighting** (for a plain ‘black line’ version)
- **Move between your selected provisions**
- **Show the footnotes for the provision, view changes in a side by side comparison, and see this pop-up full screen**
